## **MINIMUM ORDERS**

Orders amounting to **less than ¥10,000** net per order will be charged as ¥10,000 net per order plus freight and other charges.

## **WEIGHTS AND DIMENSIONS**

Weights and dimensions appearing in this catalog are the best information available at the time of going to press.

FUJI ELECTRIC FA has a policy of continuous product improvement, and design changes may make this information out of date.

Please confirm such details before planning actual construction.

**INFORMATION IN THIS CATALOG IS SUBJECT TO CHANGE WITHOUT NOTICE.**

**■ Description**

FUJI offers a new motor control system – DUO series for the international market, designed to IEC standards. The DUO series adds a new family of compact, high-performance combination starters to its IEC-compliant manual motor starters BM3 series, magnetic contactors SC series and thermal overload relays TK series to form a complete line-up of motor control products.

- Short-circuit protective coordination between protective devices and the equipment to be protected
- Conformance to IEC, UL, CSA and other international standards
- Safety and ecological consideration – safety features such as terminals with finger protection, use of recyclable materials, and resources-saving

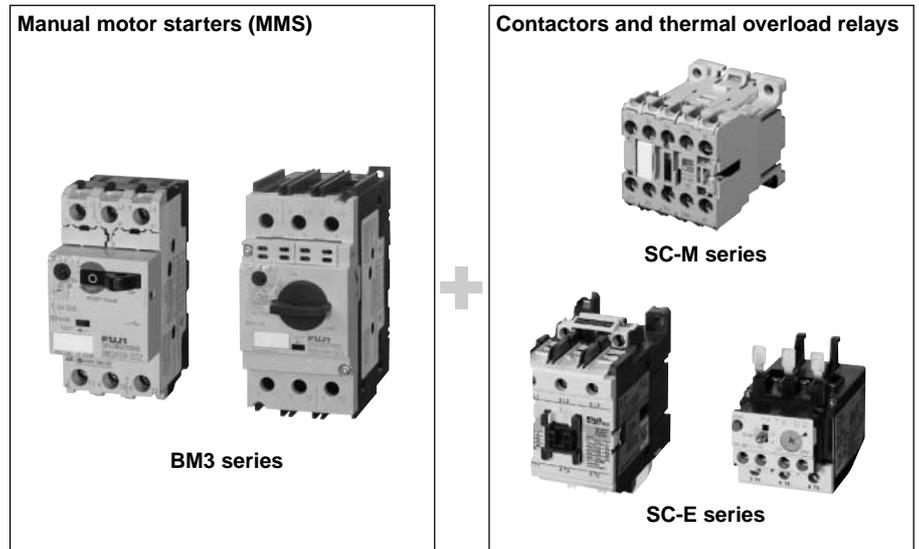

**Manual motor starters (MMS) BM3 series**

New circuit breakers for motor use that provide optimal protection by integrating the functions of a molded case circuit breaker and thermal overload relay into a highly compact unit. *See page 02/2*

**Contactors and thermal overload relays SC-M and SC-E series**

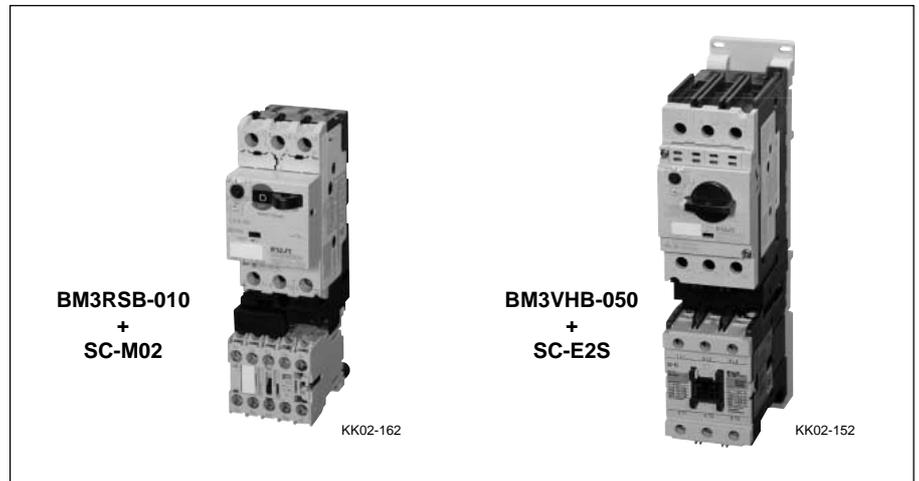

SC-M series compact magnetic contactors for small capacity motor control for 400V AC, 2.2 to 4kW.

SC-E series magnetic contactors and thermal overload relays featuring terminals with finger protection for 400V AC, 4 to 75kW. *See page 02/32*

**Combination starters**

The ability to configure combination starters for compact, reliable motor protection by combining a manual motor starter and a magnetic contactor. *See page 02/74*

# DUO series Manual Motor Starters

## General information

### Manual motor starters BM3 series

#### ■ Description

Conforming to international standards and combining compactness with high breaking performance, this versatile series features leading-edge motor protection. Molded case circuit breaker and thermal overload relay functions are integrated into a highly compact unit.

#### ■ Features

- Eight types available in two different frame sizes-32AF for the 45mm width and 63AF for the 55mm width
- A wide motor capacity range up to 30kW (400/415V AC, 63A)
- High breaking capacity  
Standard breaking capacity: 25, 50, 100kA 400V AC  
High breaking capacity: 50, 100kA 400V AC
- Adjustable thermal-magnetic trip types  
32AF: BM3RSB and BM3RHB  
63AF: BM3VSB and BM3VHB
- Instantaneous trip types  
32AF: BM3RSBK and BM3RHBK  
63AF: BM3VSBK and BM3VHBK
- Common accessories to reduce inventory
- Short-circuit protective coordination  
IEC 60947-4-1 Type1, 2
- Standards  
IEC 60947-1, 60947-2, 60947-4-1, UL 508, CSA C22.2 No.14
- Ecological design  
Recyclable thermoplastic resin used in plastic parts  
Indication of materials used  
Cadmium-free contacts
- Both rocker and rotary handle
- ON/OFF and trip state indication for all frames

#### Circuit breaker functions

- Short-circuit protection
- Overcurrent protection
- Line protection

#### Thermal overload relay functions

- Overload protection
- Phase-loss protection
- Rated current adjustment
- Ambient temperature compensation

**Compactness:**  
**57% reduction**

**Wiring work:**  
**50% reduction**

#### Manual motor starters BM3 series

KK01-317

#### BM3RSB and BM3RSBK

Rated current: 0.16 to 32A  
Rated insulation voltage: 690V  
Operation handle: Rocker handle  
Breaking capacity Icu at 400/415V:  
• 100kA up to 10A  
• 50kA up to 13A  
• 25kA up to 32A

AF01-47

#### BM3VSB and BM3VSBK

Rated current: 10 to 63A  
Rated insulation voltage: 1000V  
Operation handle: Rotary handle  
Breaking capacity Icu at 400/415V:  
• 100kA up to 10A  
• 50kA up to 13A  
• 25kA up to 63A

AF01-42

#### BM3RHB and BM3RHBK

Rated current: 0.16 to 32A  
Rated insulation voltage: 690V  
Operation handle: Rotary handle  
Breaking capacity Icu at 400/415V:  
• 100kA up to 13A  
• 50kA up to 32A

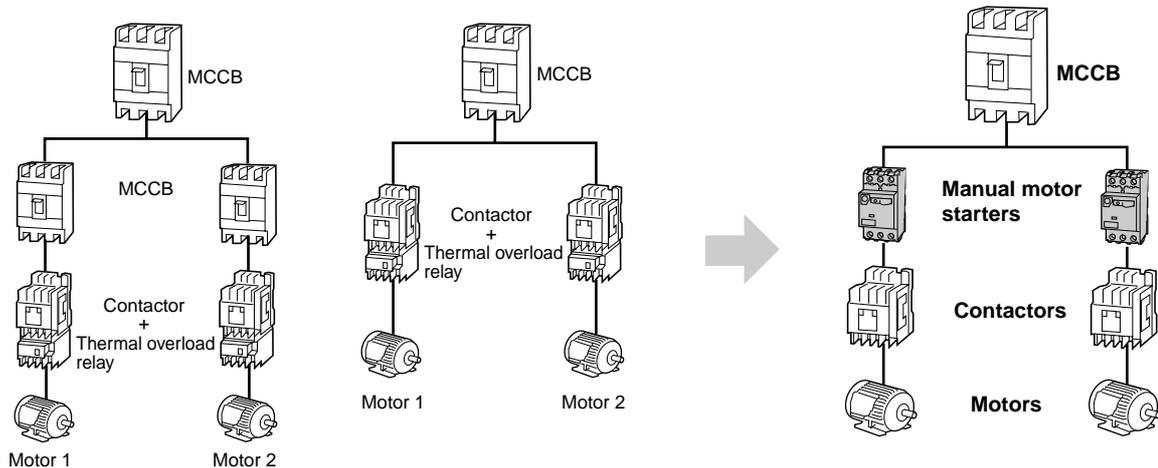

AF01-43

#### BM3VHB and BM3VHBK

Rated current: 10 to 63A  
Rated insulation voltage: 1000V  
Operation handle: Rotary handle  
Breaking capacity Icu at 400/415V:  
• 100kA up to 13A  
• 50kA up to 63A

■ Manual motor starters for branch circuit protection

The MMS provides reliable protection for overloading and short-circuiting in motor branch circuits.

Typical problem in the conventional system

Solution by using MMS system

**Short-circuit breaking protection**

When numerous small and medium motor loads exist in a circuit requiring high breaking capacity, there is no high-breaking capacity circuit breaker with a small rated current for short-circuit protection.

The MMS can be used in 100kA short-circuit current circuits for three-phase, 240V motors with rated capacity up to 15kW, and in 50kA short-circuit current circuits for three-phase, 415V motors with rated capacity up to 30kW.

**Back-up breaking system**

When a back-up MCCB is installed upstream to solve the problem described in "short-circuit breaking protection" above, an occurrence of short-circuit failure in a single load circuit also trips the upstream breaker and stops the other operating load circuits.

Despite their compact size, the 32AF and 63AF MMS provide high-performance short-circuit current breaking. They eliminate the need for an upstream circuit breaker for back-up use.

**Overload protection**

Motor protection breakers cannot be adjusted to match the rated current of the motor being protected.

Equipped with a wide-range current adjustment dial (with maximum/minimum ratio of 1.4 to 1.6), the MMS easily adjusts to match the rated current of the motor, for optimum protection.

**Control panel size**

Considerable space is required to install a back-up circuit breaker or a combination starter consisting of a circuit breaker and a thermal overload relay. As a result, the panel size has to be increased.

The compact size of the MMS, including thermal overload relay functions, enables a smaller installation area with less wiring space, for a reduction in panel size.

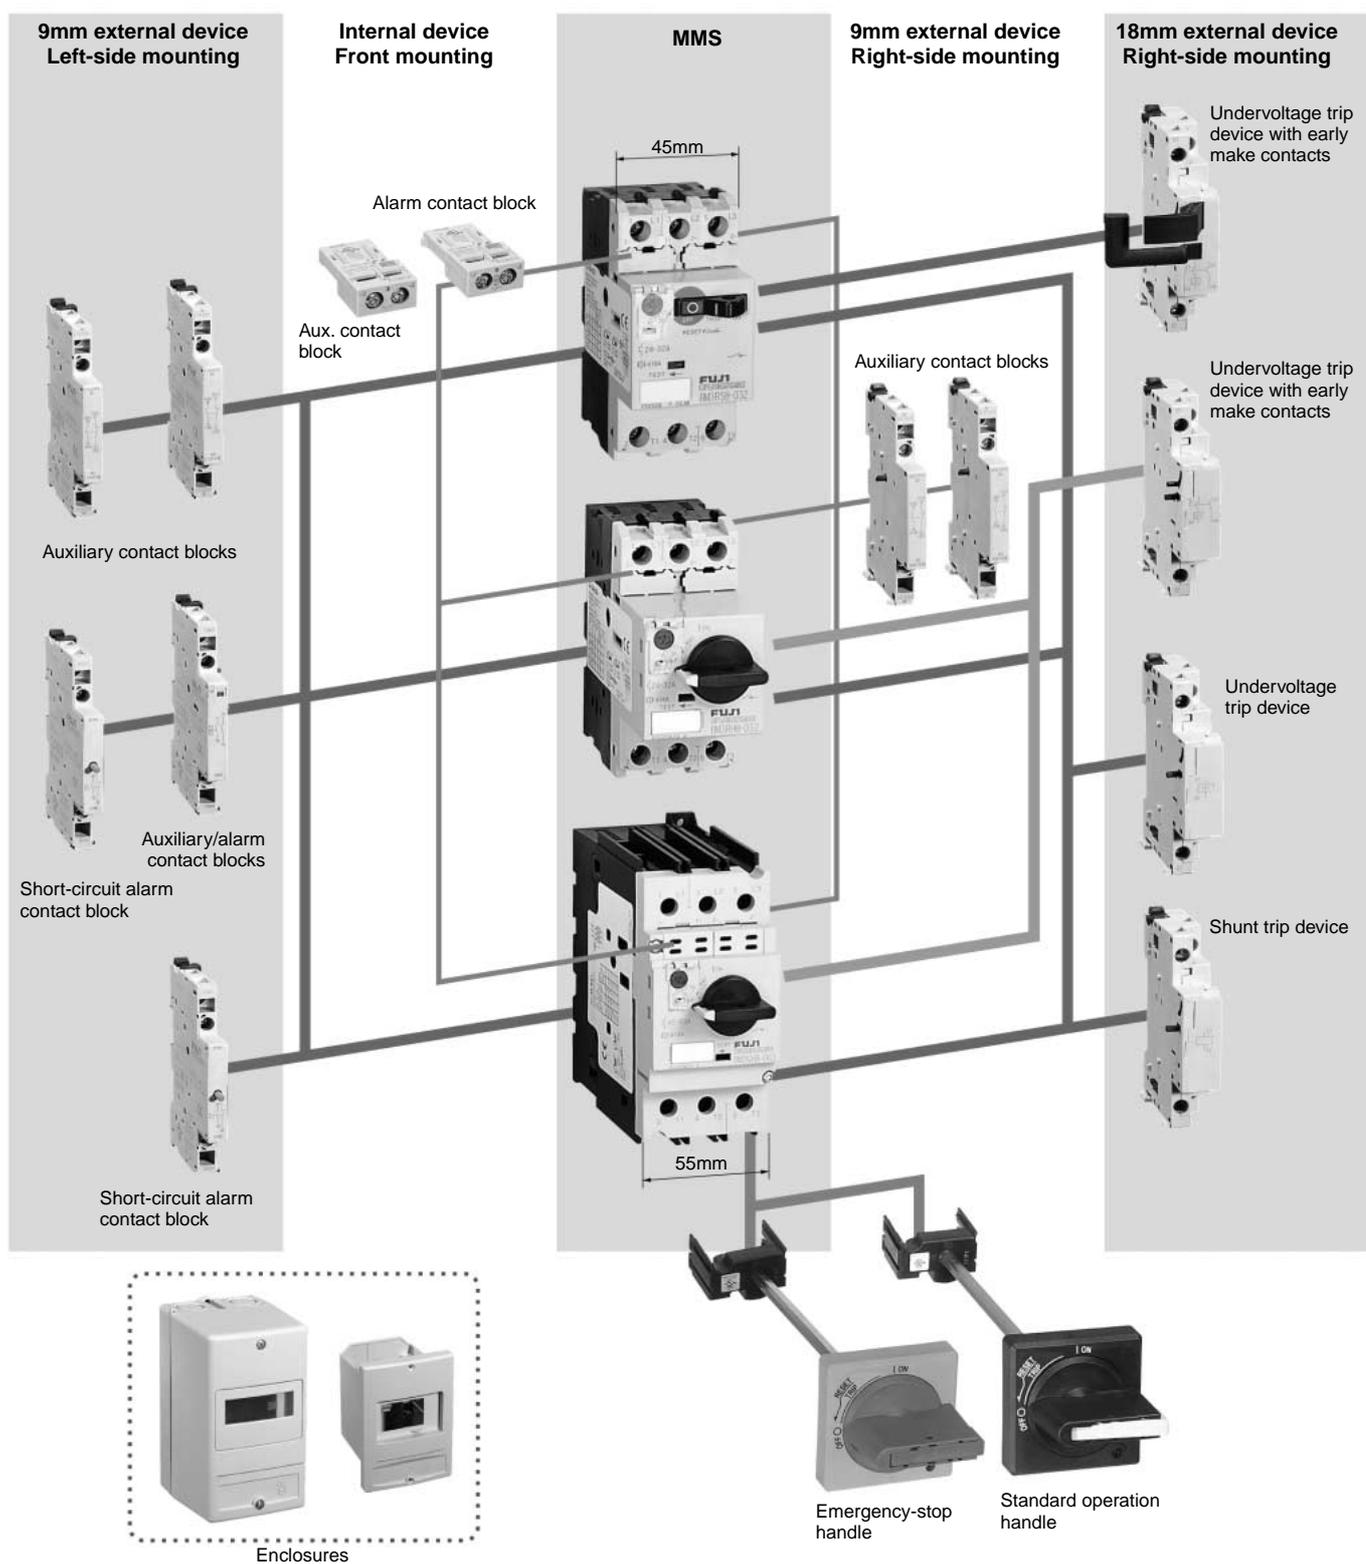

# DUO series Manual Motor Starters

## General information

### ■ Accessories

A wide variety of accessories enables a flexible response to changes in specifications.

Snap-on fittings speed up mounting.

## Adjustable thermal-magnetic trip types

### Adjustable thermal-magnetic trip types

#### ■ Features

- A wide rated operational current range of up to 32A for the 45mm wide and 63A for the 55mm wide starters.
- ON/OFF and trip indications ensure instant status recognition.
- Suitable for 3-phase motors up to 30kW at 440V AC, AC-3.
- Accessories like auxiliary contact blocks, shunt trip devices, and undervoltage trip devices have been standardized for the 45mm and 55mm wide frame sizes of the BM3R and BM3V.
- Enclosures and external operating handles are available as optional accessories.

#### ■ Standards

IEC 60947-1, 60947-2, 60947-4-1, UL 508, CSA C22.2 No.14, TÜV, CCC

1. Type number
  2. Accessories if required

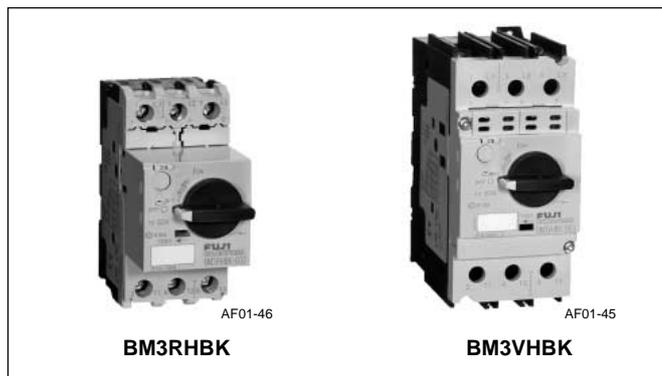

# DUO series Manual Motor Starters

## Instantaneous trip types

### Instantaneous trip types

#### ■ Features

- Instantaneous trip type for short-circuit or overcurrent protection of three-phase motors up to 63A (240V AC, 15kW, or 440V AC, 30kW).
- A motor overload protection function is not provided. Protecting the motor circuits is possible by using the starter together with a thermal overload relay that is matched to the thermal characteristics and startup time of the motor.
- Two modules, 45mm or 55mm wide, cover current ratings from 0.1 to 63A.  
RHBK: 45mm wide, rated current of 0.1 to 32A  
VHBK: 55mm wide, rated current of 6.3 to 63A
- Rotary handle
- Versatile accessories  
Internal and external auxiliary contact blocks, alarm contact block  
Short-circuit alarm contact block  
Shunt trip device  
Undervoltage trip device

#### ■ Standards

IEC 60947-1, 60947-2, 60947-4-1, UL 508  
CSA C22.2 No.14, TÜV, CCC

# DUO series Manual Motor Starters

## Ring terminal connection types

### Adjustable thermal-magnetic trip types

#### Ring terminal connection types Adjustable thermal-magnetic trip types

##### ■ Features

- Similar to FUJI MCCBs, the new type allows easy mounting and removal of the terminal cover, and up to two ring crimp terminals can be connected from the upper terminal part.
- Straight wiring connection is also possible in addition to ring terminal connection.
- The BM3RSR (0.16 to 32A rocker handle types) and BM3RHR (0.16 to 32A rotary handle types) are available.
- All optional accessories for standard manual motor starters can be mounted.
- The series conforms to IEC, UL and JIS standards, as do the standard manual motor starters.
- Crimp terminal insulation and a long terminal cover conforming to UL508 type E and F standards are available. (Purchased separately.)

Notes: \*1 Motor full-load currents are based on FUJI's standard type totally-enclosed induction motors.

\*2 Max. thermal current setting value

#### ■ Wirings

	Wire size (mm <sup>2</sup> )	Ring crimp terminal max. width (mm)	Terminal screw	Tightening torque (N·m)
Line side	1 to 8	11 (R1.25-4 to R8-4)	M4	2
Load side	1 to 8	11 (R1.25-4 to R8-4)	M4	2

■ **UL listed**

FUJI MMS is certified for Group Installation according to UL508.

When it is used with a specific current rated BCP (Branch Circuit Protective Device) such as MCCB and Fuse, two or more motors can be connected to one branch circuit as in NEC 430.53.

The followings are some of the major rules for this application.

1. The Conductor size to the motor shall be the same as the branch circuit.

2. The Conductor size to the motor shall not be less than 1/3 of the branch circuit and the length from the BCP to the MMS must not be more than 7.5m (25 feet).

3. The MMS must be "Suitable for tap conductor Protection" and the Conductor size between the BCP and MMS shall not be less than 1/10 of the BCP and the length from the BCP to the MMS must not be more than 3m (10 feet).

4. The rating of the Fuse or MCCB must be smaller than the following table.

**Optional accessories**

**■ Features**

- Auxiliary contact blocks, alarm contact blocks, and shunt/undervoltage trip devices can be used with BM3R (45mm wide) and BM3V (55mm wide) frames.
- Accessories are easily mounted.
- Internally mountable auxiliary contact blocks and alarm contact blocks can be frontally mounted.
- Externally mountable auxiliary contact blocks can be mounted on either the right or left side.
- Shunt trip and undervoltage trip devices are available in a wide operating coil voltage range.
- Standard and emergency external handles are available.
- IP20 terminal cover prevents accidental finger touch to electrically charged parts.

**■ Types and ratings**

**• Auxiliary contact blocks/W**

Description	Starter type	Mounting	Contact arrangement	Type	Mass (g)
 AF01-60L   AF01-59, 01-58  These blocks are linked to the ON/OFF operation of the MMS. Up to two internally mountable contact blocks can be mounted to the right/left front, and up to two externally mountable contact blocks can be mounted to the right/left sides.	BM3R BM3V	Front	1NO 1NC	<b>BZ0WIA</b> <b>BZ0WIB</b>	9
		Left side	2NO 1NO+1NC 2NC	<b>BZ0WUABL</b> <b>BZ0WUBBL</b>	45
		Right side	2NO 1NO+1NC 2NC	<b>BZ0WUAAR</b> <b>BZ0WUABR</b> <b>BZ0WUBBR</b>	45

**• Alarm contact blocks/K**

Description	Starter type	Mounting	Contact arrangement	Type	Mass (g)
 AF01-60R  This block operates when the MMS trips due to overload, phase-loss, or short-circuit. It is not linked to the ON/OFF operation of the MMS. Note: Operation can be checked with the test trip function.	BM3R BM3V	Front (Right side only)	1NO 1NC	<b>BZ0KIA</b> <b>BZ0KIB</b>	9

BZ0R

There may be no trip indication and no opening of the auxiliary contact even though the MMS is tripped due to short-circuit, overcurrent, or phase-loss.

##### External connection

In addition to the functions of the undervoltage trip device, this device completely opens the main circuit and control circuit when the MMS is turned OFF. However, when the MMS is tripped by a drop in the control circuit voltage, it must be reset.

### Standard operating conditions

Ambient temperature	Operating: -5 to +55°C Storage: -40 to +65°C	No sudden temperature changes resulting in condensation or icing.
Humidity	45 to 85%RH	
Altitude	2000m or lower	
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam or salt.	
Vibration	10 to 55Hz 15m/s <sup>2</sup>	No abnormal shock or vibration
Shock	50m/s <sup>2</sup>	

### Mountings

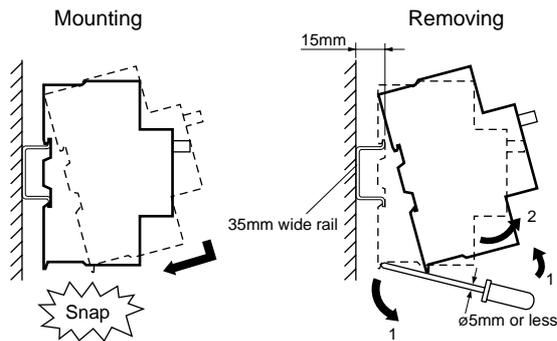

#### Rail mounting

The MMS can be mounted to a 35mm top hat rail. Secure the rail with screws at mounting pitch of less than 400mm for the BM3R type and less than 300mm for the BM3V type.

Applicable rail:

Use a 15mm-high TH35-15 rail conforming to EN-50022 and IEC715.

The standard rail mounting direction is horizontal. When using the MMS on a vertically mounted rail, use FUJI end clamp kits.

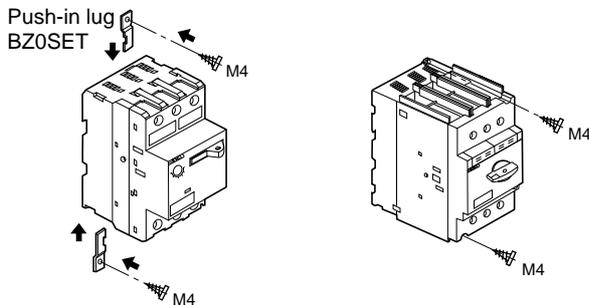

#### Screw mounting

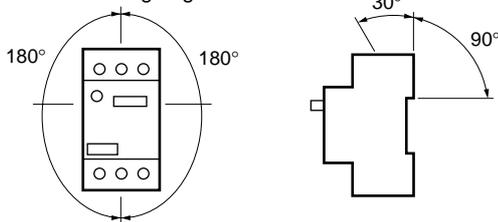

The separately sold push-in lug (BZ0SET) is required for screw mounting the BM3R frame. The BM3V frame can be screw mounted directly to the panel.

BM3RSB, RSBK  
BM3RHB, RHBK

BM3VSB, VSBK  
BM3VHB, VHBK

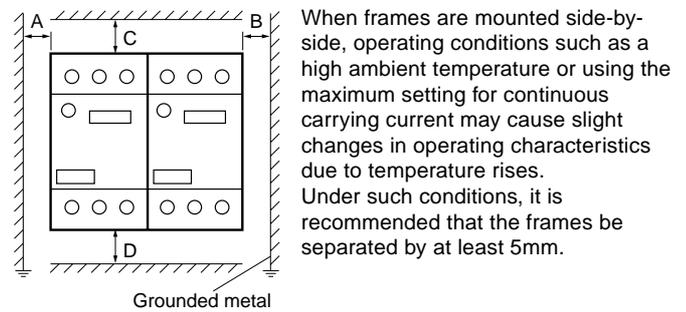

Mounting angle

### Arc space

The arc space required when mounting is shown in the table below.

Type	Rated operational voltage U <sub>e</sub> (V)	Min. distance to grounded metal (mm)	
		A, B	C, D
BM3RS	Up to 460	15	20
	500	15	30
	Up to 690	40	40
BM3RH	Up to 500	15	30
	Up to 690	40	50
BM3V	Up to 500	15	40
	Up to 690	40	50

### Wirings

While pressing the wire with a screwdriver, tighten the screw to the specified tightening torque.

Type	BM3R	BM3V	BZ0 Accessories
Solid wire (mm)	ø1.6 to 2.6	ø1.6 to 2.6	ø1 to 1.6
Stranded wire (mm <sup>2</sup> )	Single-wire	1 to 10	1 to 25
	2-wire	1 to 6	1 to 16
AWG	Single-wire	18 to 8	18 to 4
	2-wire	18 to 10	18 to 4
Sheath stripping length (mm)	Approx.10	Approx.13	Approx.10
Terminal screw	Pan head screw (PZ2) M4	Pan head screw (PZ2) M6	Pan head screw (PZ2) M3.5
Tightening torque (N·m)	2	4	0.8

Note: There is no need for a crimp terminal or any other terminal on the end of the connection wire.

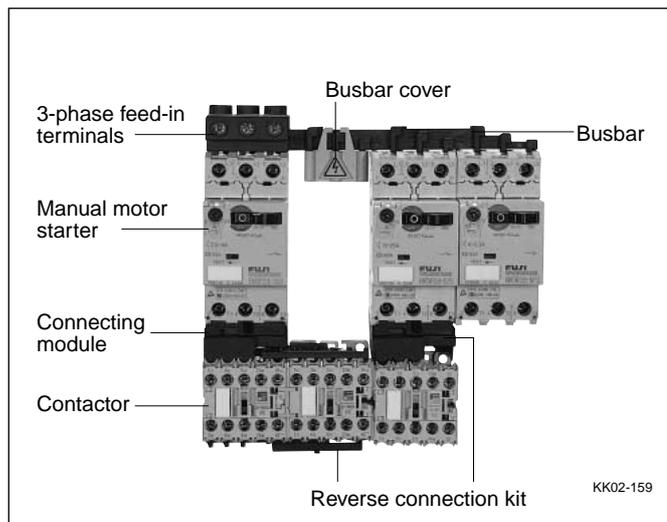

# DUO series Manual Motor Starters

## Busbar system

### Busbar system

#### ■ Features

- The busbar system reduces wiring time and saves floorspace.
- The busbar makes it easy to power from 2 to 5 manual motor starters – with no wiring needed.
- The 3-phase feed-in terminals are used to connect the wire for the power supply circuit.
- The busbar cover guards against accidental touching of non-connected busbar terminals (charged parts).

# DUO series Manual Motor Starters Busbar system

■ Dimensions, mm  
• 3-phase feed-in terminals  
**BZ0BFRA**

**BZ0BFVA**

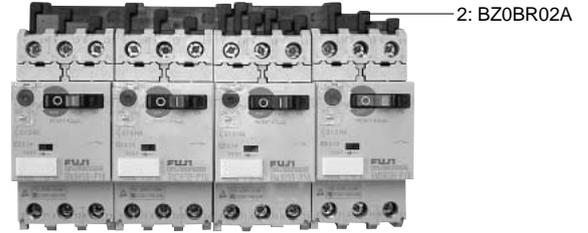

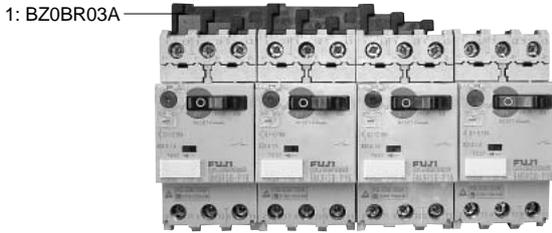

■ Busbar connection

• For BM3R

Example of two pin-connection busbars + 3-phase feed-in terminal

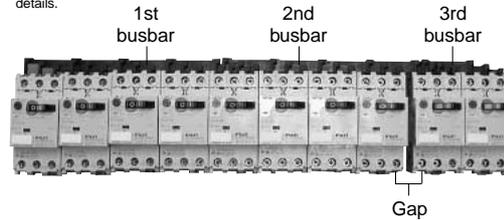

- (1) Insert the busbar 1 in the left side of MMS terminal screw.      (2) Insert the busbar 2 in the right side of MMS terminal screw.

- (3) Attach the 3-phase feed-in terminal (BZ0BFRA) to the MMS from which the busbar has been inserted in the right side of terminal screw. (The mounting position of 3-phase feed-in terminal is same too even if one busbar is to be attached.)

Note: When three or more busbars are used, a gap of 6mm will occur as shown below. Please ask FUJI for details.

Example of two fork-connection busbars + 3-phase feed-in terminal

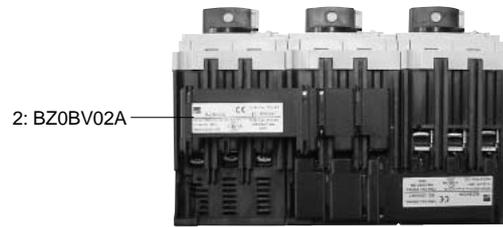

Note: When three or more busbars are to be connected, attach them on MMS, piling up and down as well as two busbars.

• For BM3V

Example of two busbars + 3-phase feed-in terminal

- (1) Insert the busbar 1 in the lower side of MMS terminal plate.      (2) Insert the busbar 2 in the upper side of MMS terminal plate.

- (3) Attach the 3-phase feed-in terminal (BZ0BFVA) to the MMS from which the busbar has been inserted in the lower side of terminal plate. (The mounting position of 3-phase feed-in terminal is same too even if one busbar is to be attached.)

Note: When three or more busbars are to be connected, insert 3rd busbar or later up and down of the terminal plate alternately. (The MMSs are capable of side-by-side mounting.)

# DUO series Manual Motor Starters Enclosures

## Enclosures

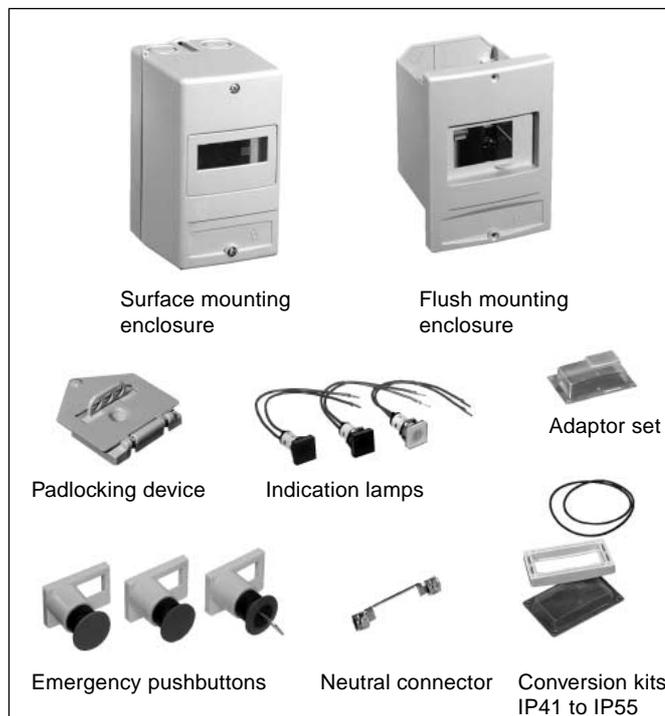

### ■ Features

- Accommodates a variety of manual motor starters (BM3RSB-P16 to 025). Put the manual motor starter inside an enclosure for use in harsh environments. Surface mounting and flush mounting types available.
- IP41 and IP55 enclosure protection degree available
- Manual motor starters (BM3RSB-P16 to 025) equipped with internal accessories and the following external accessories can be used inside an enclosure.  
 Left side: One auxiliary contact block or one auxiliary/ alarm contact block  
 Right side: One shunt trip device or one undervoltage trip device
- A wide variety of enclosure accessories are available. Padlocking device, emergency mushroom pushbutton, conversion kit, and indicator lamps

### ■ Types and ratings

# DUO series Contactors

## SC-M and SC-E series

### General information

In addition to the five basic concepts of the existing SC series of magnetic contactors and motor starters — international standardization, compactness, safety, utility, and ecology — the SC-M and SC-E series take the line-up to the next step in utility with a new finger protection terminal and box lug terminal construction.

#### International standardization

IEC 60947-4-1, EN 60947-4-1, VDE 0660  
UL 508, CSA C 22.2, JIS C 8201-4-1

#### Compactness

- SC-M01, M02: 45mm wide
- SC-E02 to E05: 43mm wide, SC-E1 to E2S: 54mm wide
- SC-E3, E4: 67mm wide, SC-E5: 88mm wide
- Reducing mounting area

#### Safety

- Terminals with finger-touch protection (DIN 57106/ VDE 0106 Teil100)

#### Utility

- Box lug terminal construction
- Long electrical life
- Reduction of wiring work

#### Ecology

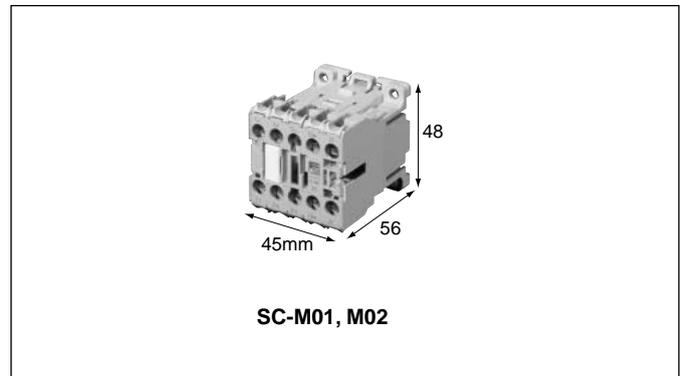

- Reducing power consumption
- Recycled thermoplastic resin used for plastic parts.
- The names of materials are indicated on all major parts to facilitate their recycling.

#### SC-M series

2.2 to 4kW, 400V AC

##### ■ Description

Optimal 45mm-wide mini-magnetic contactors for small-capacity induction motor control. A wide range of accessories ensures the flexibility to meet user needs.

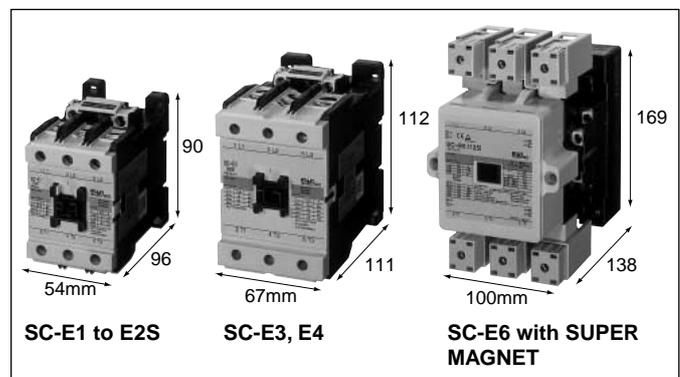

#### SC-E series

4 to 75kW, 400V AC

##### ■ Description

Models SC-E02 to SC-E4 have a 3-pole main circuit structure. Available in three frame sizes, 43mm, 54mm, and 67mm wide, they enable a significantly reduced mounting area. Models SC-E5 to SC-E7 use an IC-controlled SUPER MAGNET to ensure high operating reliability.

**SC-M series magnetic contactors / Non-reversing**

■ **Features**

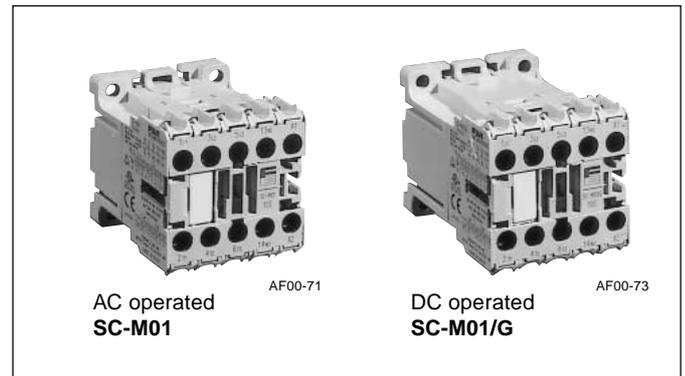

- 45mm-wide compact magnetic contactors
- Terminal block with easy wiring that prevents the accidental finger touch to live parts.
- Snap-on mounting to 35mm-wide top hat rail (DIN)
- Electrical durability of one million operations
- Two models with low power consumption (1.2W and 2W at 24V DC) as well as standard DC-operation models
- Many optional accessories: Auxiliary contact block, coil surge suppression unit, and solid-state time-delay unit

■ **Standards**

IEC 60947-4-1, EN 60947-4-1, VDE 0660  
UL 508, CSA C 22.2, JIS C 8201-4-1, JEM 1038

■ **Types and ratings**

• **Non-reversing**

■ **Accessories**

A full range of accessories with the emphasis on utility.

Contactors: SC-M series

Thermal overload relays: TK-M series

■ **Type number nomenclature**

**SC-M01/G**

Operating coil

- Blank: AC operated
- G: 12–220V DC operated, power consumption 3W
- G1: 24V DC operated, power consumption 1.2W
- G2: 24V DC operated, power consumption 2W

Max. motor capacity

- M01: 2.2kW at 380–440V
- M02: 4kW at 380–440V

■ **Ordering information**

Specify the following:

1. Type number
2. Operating coil order voltage (See page 02/37)
3. Auxiliary contact arrangement

# DUO series Contactors

## SC-M series

### SC-M series magnetic contactors/Reversing

#### ■ Features

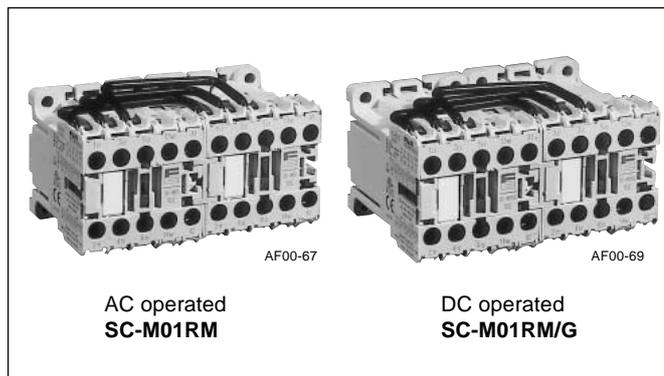

- Ideal for the forward-reverse operation of 3-phase motors or plugging stops.
- Mechanical interlock
- 90mm wide (same as two magnetic contactors)
- Snap-on mounting to 35mm-wide top hat rail (DIN).

#### ■ Standards

IEC 60947-4-1, EN 60947-4-1, VDE 0660  
UL 508, CSA C 22.2, JIS C 8201-4-1, JEM 1038

Notes: Ratings conform to IEC 60947-4-1

<sup>\*1</sup> The reversing magnetic contactors with 1NOx2 auxiliary contacts cannot be arranged to form an electrical interlock circuit by themselves. When using the contactors, be sure to arrange an electrical interlock circuit externally to prevent short-circuit accidents from simultaneous switching.

<sup>\*2</sup> The reversing magnetic contactors with 1NCx2 auxiliary contacts can be arranged to form an electrical interlock circuit with additional wiring. When using the contactors, arrange an electrical interlock circuit internally or externally to prevent short-circuit accidents from simultaneous switching.

### ■ Electrical durability

#### • AC-1 duty / 380 to 440V AC

#### • AC-3 duty / 380 to 440V AC

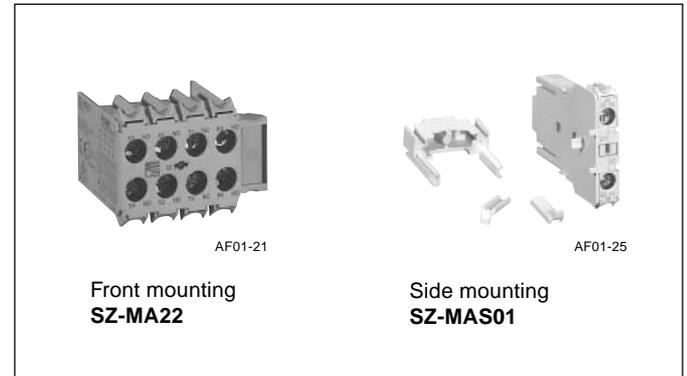

■ **Optional accessories**

• **Auxiliary contact blocks**

The front mounting auxiliary contact block allows two or four auxiliary contacts to be added without increasing the mounting area of the magnetic contactors. The side mounting auxiliary

contact block allows two auxiliary contacts to be added to the magnetic contactors without increasing the depth.

Mounting	No. of contacts	Contact arrangement	Type
Front mounting	4	4NO	<b>SZ-MA40</b>
		3NO+1NC	<b>SZ-MA31</b>
		2NO+2NC	<b>SZ-MA22</b>
		1NO+3NC	<b>SZ-MA13</b>
	2	4NC	<b>SZ-MA04</b>
		2NO	<b>SZ-MA20</b>
Side mounting	1	1NO+1NC	<b>SZ-MA11</b>
		2NC	<b>SZ-MA02</b>
		1NO	<b>SZ-MAS10</b>
		1NC	<b>SZ-MAS01</b>

The auxiliary contact blocks can be used in combination with the magnetic contactors listed in the following table. The front mounting and side mounting auxiliary contact blocks cannot be used together.

Auxiliary contact block				Used with

• **Coil surge suppression unit**

The coil surge suppression unit on to the magnetic contactor.

Device	Operating coil voltage and frequency	Type
CR	12–60V AC 50/60Hz	<b>SZ-MZ1</b>
	72–250V AC 50/60Hz	<b>SZ-MZ2</b>
Diode	6–250V DC	<b>SZ-MZ3</b>

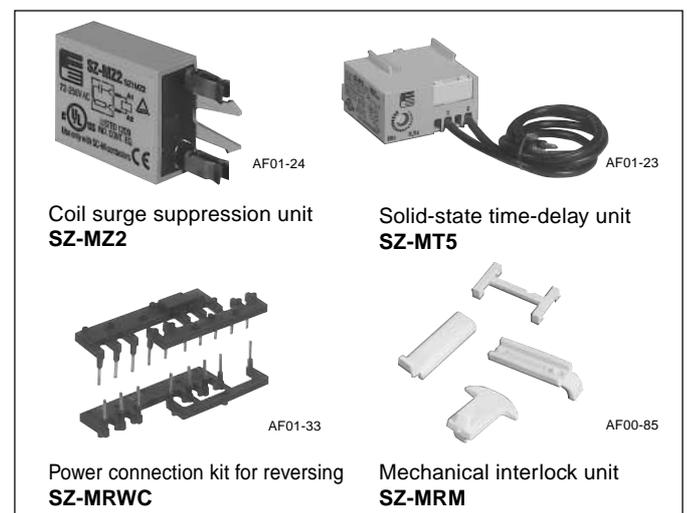

• **Power connection kit for reversing / SZ-MRWC**

This kit includes an electrical interlock circuit to convert a magnetic contactor into a reversing magnetic contactor.

• **Solid-state time-delay unit**

The solid-state time-delay unit used with the magnetic contactor works as an on-delay timer.

Operation	Operating coil voltage and frequency	Timing range	Type
On-delay	24–250V AC/DC 50/60Hz	0.2–24s	<b>SZ-MT2</b>
		0.5–60s	<b>SZ-MT5</b>

• **Mechanical interlock unit / SZ-MRM**

The mechanical interlock unit provides a mechanical interlock with assembly parts to convert a magnetic contactor into a reversing magnetic contactor.

Mass: 1g (3-set)

#### • Power connection kit for reversing SZ-MRM

Mass: 27g

#### • Solid-state time-delay unit SZ-MT2, MT5

Mass: 38g

#### ■ Standard operating conditions

Ambient temperature	Operating: -5 to 55°C No sudden temperature changes resulting in condensation or icing (The average temperature over a 24-hour period must not exceed 35°C) Storage: -40 to 65°C
Humidity	45 to 85%RH
Altitude	2000m or lower
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam, or salt.
Vibration	10 to 55Hz 15m/s <sup>2</sup>
Shock	50m/s <sup>2</sup>
Mounting	Screw mounting, 35mm-wide top hat rail (DIN)
Mounting angle	
Standard	IEC 60947-4-1, EN 60947-4-1, VDE 0660 JIS C 8201-4-1, UL 508, CSA C22.2 TÜV (EN60947-4-1)

#### ■ Wiring

Terminal screw	M3.5
Connectable wire size	1.25 to 2mm <sup>2</sup> (ø1.2 to 2mm)
Applicable round crimp terminal	7.5mm (R2-3.5)
Tightening torque	0.8 to 1.0N·m
Tool	Pozi-drive screwdriver

**SC-E series magnetic contactors/non-reversing**

■ **Features**

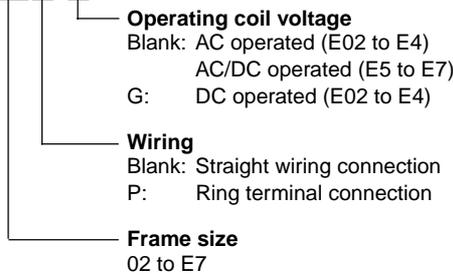

- Models SC-E02 to SC-E4 have 3-pole main circuits and come in three sizes with widths of 43mm (up to 25A), 54mm (up to 50A), and 67mm (up to 80A).
- Models SC-E1 to SC-E7 employ a box type terminal that allows wires to be connected directly to the main circuit.
- Equipped with a finger-protection terminal structure (IP20) that prevents accidental finger touch to live parts.
- Models SC-E5 to SC-E7 use a SUPER MAGNET (AC/DC-input/DC-operate) to achieve high operating reliability.

■ **Standards**

**SC-E series magnetic contactors/reversing**

**■ Features**

- Ideal for the forward-reverse operation of 3-phase motors or plugging stops.
- Mechanical interlock
- Snap-on mounting to 35mm-wide top hat rail (DIN). (E02 to E4)

**■ Type number nomenclature**

**SC-E2RM/G**

**■ Ordering information**

Specify the following:

1. Type number
2. Operating coil order voltage (See page 02/51)
3. Auxiliary contact arrangement

**■ Types and ratings**

Notes: • Ratings conform to IEC 60947-4-1

- \*1 The above types are shipped in a set containing two magnetic contactors, one SZ-RM mechanical interlock unit, two front mounting auxiliary contact blocks, and electrical interlock wiring. The power connection kit for the reversing contactor is sold separately.
- To prevent short-circuit faults when using SC-E02R to SC-E04RM types for high-speed switching, provide a time delay relay or other electrical interlock to ensure that the switching time is 15ms min.
- For combined use with an MMS, instead of ordering a reversing type, order and assemble the individual components (two magnetic contactors, one SZ-RM mechanical interlock unit, two auxiliary contact blocks, and the power connection kit (SZ-ERW□/A, SZ-ERW□/B)).

\*1 Equipped with the SZ-A11/T, SZ-A02/T, SZ-A31/T, or SZ-A22/T front mounting auxiliary contact block.

• For motor starter use, order the power connection kit and thermal overload relay.

### SC-E series contactors, ring terminal connection types

#### ■ Features

- The new type allows wiring with ring crimp terminals in addition to the conventional straight wiring connection. Types SC-E02P to SC-E2SP also enable straight wiring connection.
- A new slide-type terminal cover is easy to mount and remove. Up to two ring crimp terminals can be connected from the upper terminal part.
- Three module designs with widths of 43mm (up to 25A), 54mm (up to 50A), and 67mm (up to 80A) provide an ideal combination with manual motor starters for ring terminal connection.
- UL, CSA (cUL) approval is pending.

## SC-E series

### ■ Operating coil

#### • AC coil, SC-E02 to SC-E4

Order voltage	Coil operating voltage and frequency
<b>AC24V</b>	24V AC 50Hz / 24–26V AC 60Hz
<b>AC48V</b>	48V AC 50Hz / 48–52V AC 60Hz
<b>AC100V</b>	100V AC 50Hz / 100–110V AC 60Hz
<b>AC110V</b>	100–110V AC 50Hz / 110–120V AC 60Hz
<b>AC120V</b>	110–120V AC 50Hz / 120–130V AC 60Hz
<b>AC200V</b>	200V AC 50Hz / 200–220V AC 60Hz
<b>AC220V</b>	200–220V AC 50Hz / 220–240V AC 60Hz
<b>AC240V</b>	220–240V AC 50Hz / 240–260V AC 60Hz
<b>AC380V</b>	346–380V AC 50Hz / 380–420V AC 60Hz
<b>AC400V</b>	380–400V AC 50Hz / 400–440V AC 60Hz
<b>AC440V</b>	415–440V AC 50Hz / 440–480V AC 60Hz
<b>AC500V</b>	480–500V AC 50Hz / 500–550V AC 60Hz

Note: Other voltages are available in 24 to 600V AC on request.

#### • DC coil, SC-E02/G to SC-E4/G

Order voltage	Coil operating voltage
<b>DC12V</b>	12V DC
<b>DC24V</b>	24V DC
<b>DC48V</b>	48V DC
<b>DC60V</b>	60V DC
<b>DC100V</b>	100V DC
<b>DC110V</b>	110V DC
<b>DC120V</b>	120V DC
<b>DC200V</b>	200V DC
<b>DC210V</b>	210V DC
<b>DC220V</b>	220V DC

Note: Other voltages are available in 12 to 250V DC on request.

#### • AC/DC coil (SUPER MAGNET), SC-E5 to SC-E7

Order voltage	Coil operating voltage and frequency
<b>24V</b>	24–25V AC 50/60Hz, 24V DC
<b>48V</b>	48–50V AC 50/60Hz, 48V DC
<b>100V</b>	100–127V AC 50/60Hz, 100–120V DC *1
<b>200V</b>	200–250V AC 50/60Hz, 200–240V DC *2
<b>400V</b>	380–450V AC 50/60Hz
<b>500V</b>	460–575V AC 50/60Hz

Notes: • Other voltages are available in 24 to 575V AC (24 to 240V DC) on request.

\*1 The coil voltage from DC power supply with single-phase full-wave rectification will be 100–110V.

\*2 The coil voltage from DC power supply with single-phase full-wave rectification will be 200–220V.

## SC-E series

### ■ Electrical durability

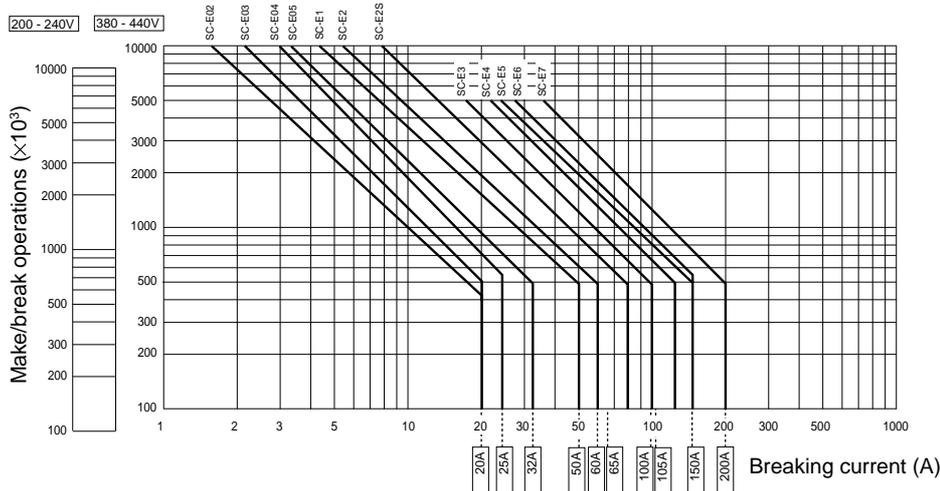

#### • AC-3 duty / SC-E02 to SC-E05

#### • AC-3 duty / SC-E1 to SC-E7

#### • AC-1 duty / SC-E02 to SC-E7

■ **Optional accessories**

• **Auxiliary contact blocks with terminal covers**

The front mounting auxiliary contact block allows two or four auxiliary contacts to be added without increasing the mounting area of the magnetic contactors. The side mounting auxiliary contact block allows two auxiliary contacts to be added to the magnetic contactors without increasing the depth.

Applicable contactor	Mounting	No. of contacts	Contact arrangement	Type
SC-E02 to E4	Front mounting	4	4NO 3NO+1NC 2NO+2NC	<b>SZ-A40/T</b> <b>SZ-A31/T</b> <b>SZ-A22/T</b>

### Dimensions

#### ■ Dimensions, mm

#### • Mechanical interlock unit SZ-RM

#### • Power connection kit for reversing For crossover wiring/SZ-ERW1/A

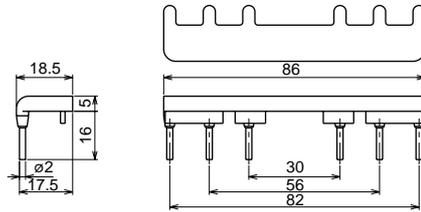

Mass : 19g

Used with	Wiring side	Wiring
SC-E02RM, E03RM, E04RM, E05RM	Line side	
SC-E02RM/G, E03RM/G, E04RM/G, E05RM/G		

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW1/D type power connection kit.

#### For phase replacing wiring/SZ-ERW1/B

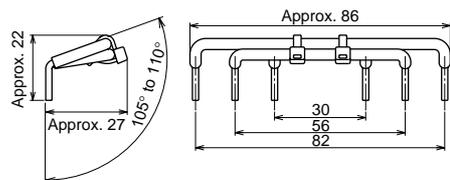

Mass : 17g

Used with	Wiring side	Wiring
SC-E02RM, E03RM, E04RM, E05RM	Load side	
SC-E02RM/G, E03RM/G, E04RM/G, E05RM/G		

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW1/D type power connection kit.

#### For phase replacing wiring/SZ-ERW1/D

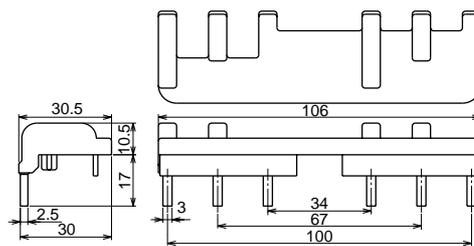

Mass : 13g

Used with	Wiring side	Wiring	Cable
SC-E02RM, E03RM, E04RM, E05RM	Load side		UL No3271 AWG12(Dia. Ø2) Color : Black
SC-E02RM/G, E03RM/G, E04RM/G, E05RM/G			

Note : Use this connection kit for assembly using the attachment tab of the thermal overload relay.

#### For crossover wiring/SZ-ERW2/A

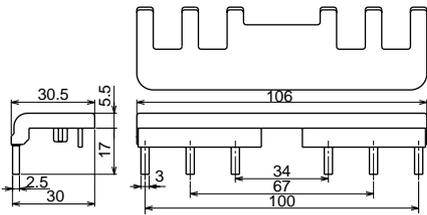

Mass : 48g

Used with	Wiring side	Wiring
SC-E1RM, E2RM, E2SRM	Line side	
SC-E1RM/G, E2RM/G, E2SRM/G		

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW2/D type power connection kit.

■ Dimensions, mm

**For phase replacing wiring/SZ-ERW2/B**

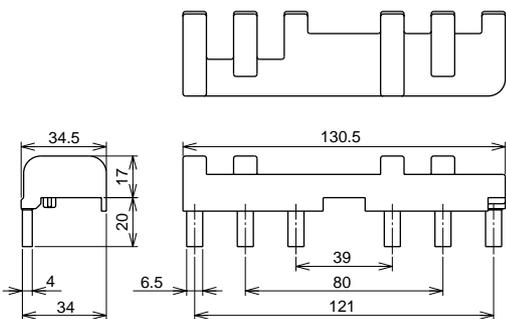

Mass : 42g

Used with	Wiring side	Wiring
SC-E1RM, E2RM, E2SRM	Load side	
SC-E1RM/G, E2RM/G, E2SRM/G		

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW2/D type power connection kit.

**For crossover wiring/SZ-ERW3/A**

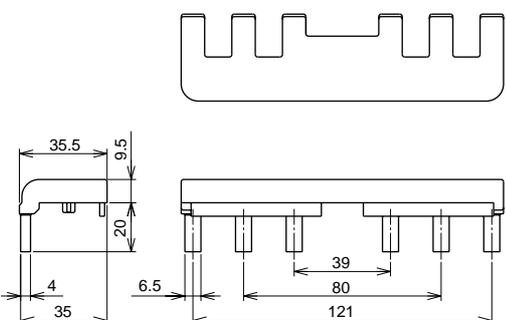

Mass : 162g

Used with	Wiring side	Wiring
SC-E3RM, E4RM	Line side	
SC-E3RM/G, E4RM/G		

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW3/D type power connection kit.

**For phase replacing wiring/SZ-ERW3/B**

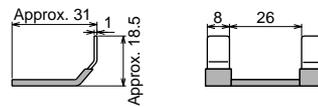

Mass : 138g

Used with	Wiring side	Wiring
SC-E3RM, E4RM	Load side	
SC-E3RM/G, E4RM/G		

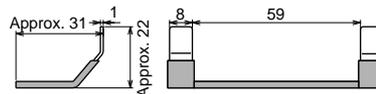

Note : When using this connection kit, use a separate mounting thermal overload relay to connect to the magnetic contactor. If the attachment tab is used for assembly to the magnetic contactor, interference by components will make assembly impossible. To assemble using the attachment tab, use the SZ-ERW3/D type power connection kit.

**For phase replacing wiring/SZ-ERW2/D**

SC-E02PRM/G, E03PRM/G, E04PRM/G, E05PRM/G		

■ **Standard operating conditions**

The magnetic contactors are manufactured for use in the standard operating conditions given in the table at the right. Consult FUJI before using the magnetic contactors in different conditions.

■ **Wirings**

• **Connection wires and terminal processing**

Be sure to perform wiring correctly with reference to the connections diagram. Main terminals for models SC-E02 to SC-E7 are wired using solid wires or stranded wires. Stranded wires or flexible stranded wires can be connected by twisting them together, crimping a sleeve (ferrule) onto them before connecting.

• **Tightening torque**

If wires are not tightened sufficiently, they may become hot or come loose and result in a fire, short-circuit, electric shock, or some other potentially dangerous situation. Be sure to tighten the wires to the torques specified in the tables below.

• **Connectable wire sizes, tightening tools, tightening torques**

**Main circuit**

Contactor type	SC-E02, SC-E03, SC-E04, SC-E05	
Solid wire (mm <sup>2</sup> )	One	0.75 to 6
	Two	1 to 4 or 1.5 to 6
Stranded wire (mm <sup>2</sup> ) *1	One	0.75 to 6
	Two	1 to 4 or 1.5 to 6
AWG	One	18 to 10
	Two	18 to 12 or 16 to 10
Sheath stripping length (mm)		
Terminal screw size	M4	
Tool	⊕ Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖ Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)	
Tightening torque (N·m)	1.2 to 1.5

### Operating conditions

#### • Connectable wire size and tightening torque (Ring terminal connection type)

##### Main circuit

Contactor type	Terminal screw *1	Connectable wire size (mm <sup>2</sup> )	Applicable ring terminal max. width (mm) *2 *4	Tightening torque (N·m)
SC-E02P to E05P	M4  	1.25 to 6	9.7 (R1.25-4 to R5.5-4)	1.2 to 1.5
SC-E1P to E2SP	M5  	2 to 22	12.4 *3 (R2-5 to R22-5)	2.0 to 2.5
SC-E3P, E4P	M6  	2 to 38	16.7 *3 (R2-6 to R38-6)	4.0 to 5.0

##### Control circuit

Contactor type	Terminal screw *1	Connectable wire size (mm <sup>2</sup> )	Applicable ring terminal max. width (mm) *2	Tightening torque (N·m)
	Coil terminal (Contactor)	Coil terminal (Contactor)	Coil terminal (Contactor)	Coil terminal (Contactor)
SC-E02P to E4P	M3.5  	1.25 to 2 (1.2 to 2mm dia.)	7.7 (R1.25-3.5 to R2-3.5)	0.8 to 1.0

Note 1 The motor starter has plus-minus shaped terminal screws of   (M4, M5).

Note 2 Two wires or two crimp terminals can be connected to each terminal.

Note 3 Use insulation caps to use ring crimp terminals.

\*1  : Cross-recessed pan-head screw  : Non-oriented square washer, turtleback washer

– : Circular bright plain washer  : Cross-recessed hexagonal head bolt

\*2 Round crimp terminal JIS C 2805

\*3 Use crimp terminals of max. width or less. (Use narrow-width terminals made by crimp terminal manufacturers.)

\*4 Use crimp terminal manufacturers' standard models.

**TK-E series with phase-loss protective device**

■ **Features**

- This relay protects motor windings from burning due to overloads, locked rotor current, or phase-loss.
- Maintenance and inspection safety has been improved by employing a finger protection mechanism to cover exposed terminals (conforms to DIN 57106, VDE 0106 Teil 100).
- Isolated NO and NC contacts can be used with different potentials.
- A high-precision scale for the current adjustment dial enables easy and exact current setting.
- The operating status can be visually checked with ease.
- The relays can be manually tripped. A trip-free mechanism is also provided.
- Base unit can be added to enable separate-mounting types of the TK-E02, E2, and E3 models.

## SC-E series

### Thermal overload relays

#### ■ Standard operating conditions

The thermal overload relays are manufactured for use in the standard operating conditions given in the table at the right. Consult FUJI before using the thermal overload relays in different conditions.

Ambient temperature	Operating: -5 to 55°C No sudden temperature changes resulting in condensation or icing (The average temperature over a 24-hour period must not exceed 35°C) Storage: -40 to 65°C
Humidity	45 to 85%RH
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam, or salt
Vibration	10 to 55Hz 15m/s <sup>2</sup>
Shock	50m/s <sup>2</sup>

#### ■ Wirings

##### • Connection-wires and terminal processing

Be sure to perform wiring correctly with reference to the connections diagram. Main terminals for models TK-E02 to TK-E6 are wired using solid wires or stranded wires. Stranded wires or flexible stranded wires can be connected by twisting them together, crimping a sleeve (ferrule) onto them before connecting.

##### • Tightening torque

If wires are not tightened sufficiently, they may become hot or come loose and result in a fire, short-circuit, electric shock, or some other potentially dangerous situation. Be sure to tighten the wires to the torques specified in the tables below.

##### • Connectable wire sizes, tightening tools, tightening torques

###### Main circuit

Thermal overload relay type	TK-E02	
Base unit type	SZ-HCE	
Solid wire (mm <sup>2</sup> )	One	0.75 to 4
	Two	1 to 4
Stranded wire (mm <sup>2</sup> ) *1	One	0.75 to 4
	Two	1 to 4
AWG	One	18-12
	Two	18-12
Sheath stripping length (mm)		
Terminal screw size	M4	
Tool	⊕ Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖ Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)	
Tightening torque [N·m]	1.2 to 1.5	

###### Control circuit

Solid or stranded wire (mm <sup>2</sup> )	One	0.75 to 2.5 (ø1 to ø1.6)
	Two	0.75 to 1.5 or 1.5 to 2.5
AWG	One	18 to 14
	Two	18 to 14
Sheath stripping length (mm)		
Fork terminal	Max. 7.7mm wide (R2-3.5)	
Terminal screw size	M3.5	
Tool	⊕ Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖ Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)	
Tightening torque [N·m(lb·in)]	0.8 to 1	

Thermal overload relay type	TK-E2	TK-E3	TK-E5	TK-E6, E6H
Base unit type	SZ-HDE	SZ-HEE	-	-
	Solid or stranded wire (mm <sup>2</sup> ) *1	0.75 to 22	1 to 38	16 to 70
	Flexible stranded wire with sleeve (mm <sup>2</sup> )	0.75 to 22	1 to 38	16 to 70

	Tightening torque (N·m)	2.5	6	10

Notes: \*1 Stranded wire (0 to 35mm<sup>2</sup>) consists of 7 wires or less.  
Stranded wire (38 to 120mm<sup>2</sup>) consists of 19 wires or less.  
Flexible stranded wire consists of more number wires than the above.

■ **Description**

- The combination starter protects the motor from short-circuit and overcurrent accidents in the three-phase motor circuit within a range between 15kW at 240V AC and 22kW at 415V AC, up to a current level of 50A.
- The manual motor starter provides overload, phase-loss, and short-circuit protections for the motor circuit, and incorporates a dial for flexible adjustment to match the total load current of the motor.
- The magnetic contactor allows remote ON/OFF operation of the motor circuit with high frequency, and features a electrical durability of one million operations.
- The manual motor starter and magnetic contactor are connected via link module and mounted to a base plate.

■ **Features**

**Reduction and space-saving design**

- The combination starter consists of a manual motor starter and magnetic contactor that can be assembled by the user to achieve a compact motor control circuit.
- The modular wiring system reduces wiring works, shortens required mounting time, and decreases the mounting area.
- The busbar system and connecting modules make it possible to reduce complicated wiring work.

**Comforms to IEC standard**

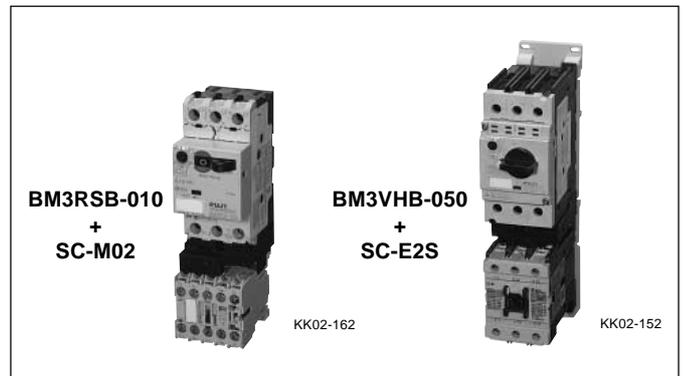

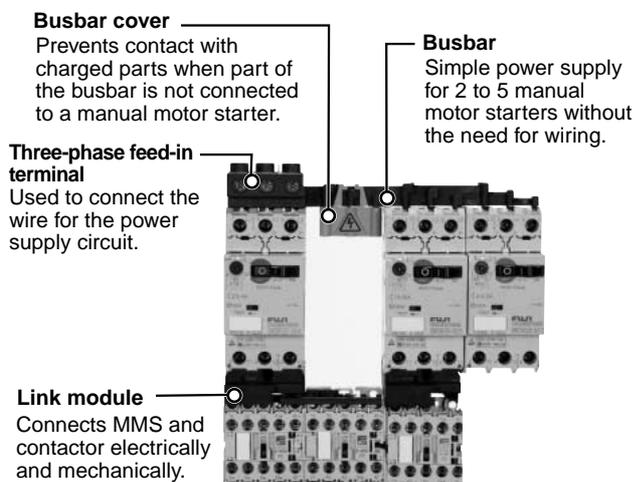

- The combination starter conforms to IEC 60947 requirements for magnetic motor starters and short circuit protective device of coordination types 1 and 2, thus greatly reducing the possibility of an accident spreading to affect other equipment.
- The combination starter can be mounted to IEC top hat rail using the base plate.

**Protection against exposure to charged parts**

- A busbar system, busbar cover, and terminals with finger protection prevent exposure to charged parts.

■ **Busbar system**

Various wiring materials available to reduce both wiring and wiring steps.

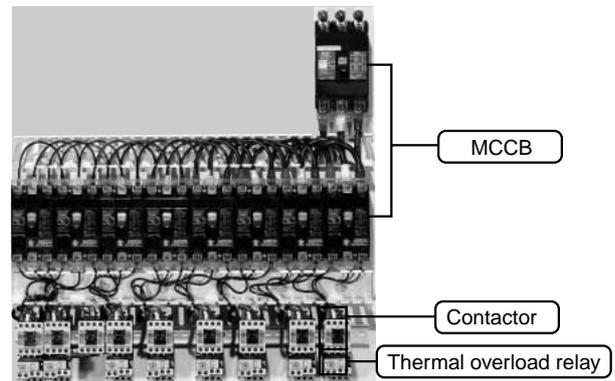

■ **Application example**

Combining modular equipment enables compact control panel configurations.

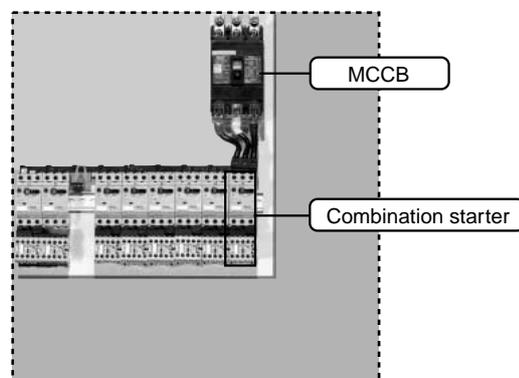

Combination starters and busbar systems help to downsize equipment.

• **Example of 8-motor control circuit**

**Conventional control panel**

**New control panel**

**Mounting space: 52% reduction**

**Wiring space: 90% reduction**

• Base plate coupling kit

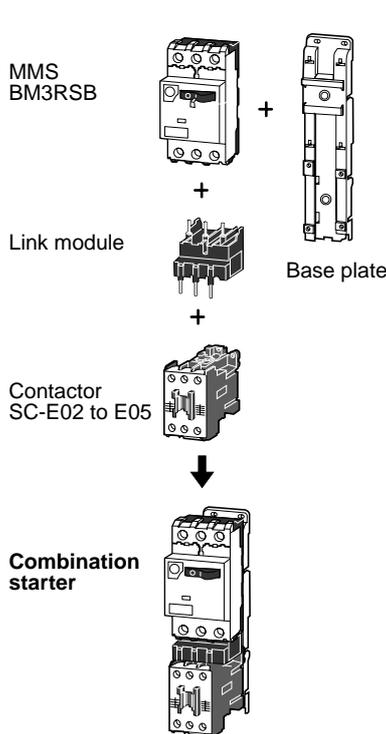

Description	Applicable base plate	Type	Mass(g)
 <p>The base plate coupling kit is used to couple two base plates that are mounted with combination starters consisting of manual motor starters and SC-E□RM reversing magnetic contactors.</p> <p>(No.KK03-036)</p>	BZ0BPRE22A BZ0BPRE32A BZ0BPVE51A BZ0BPVE65A	<b>BZ0BPCA</b>	4

■ Combination starter configurations

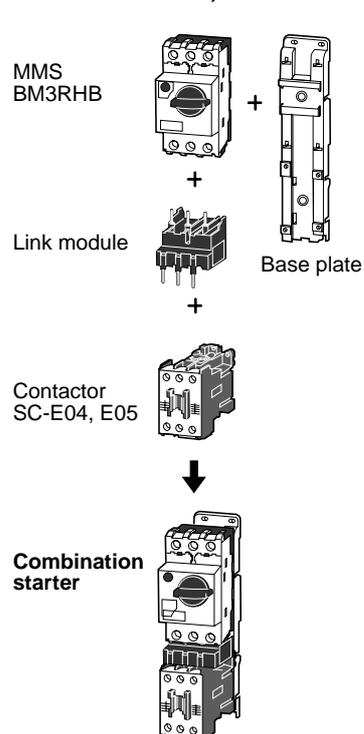

• BM3RSB+SC-M01, M02

• BM3RSB+SC-E02 to E05

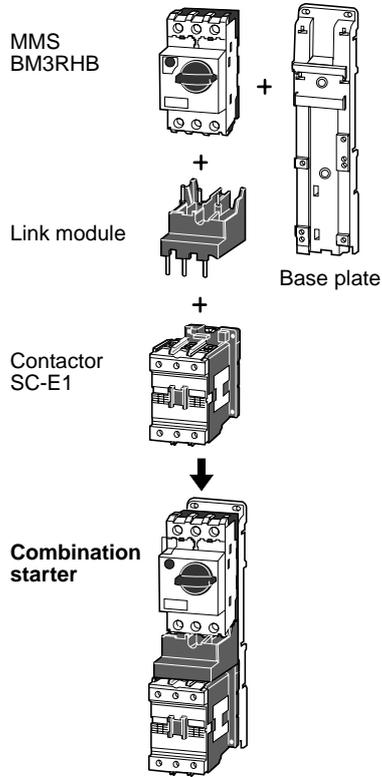

• BM3RHB+SC-E04, E05

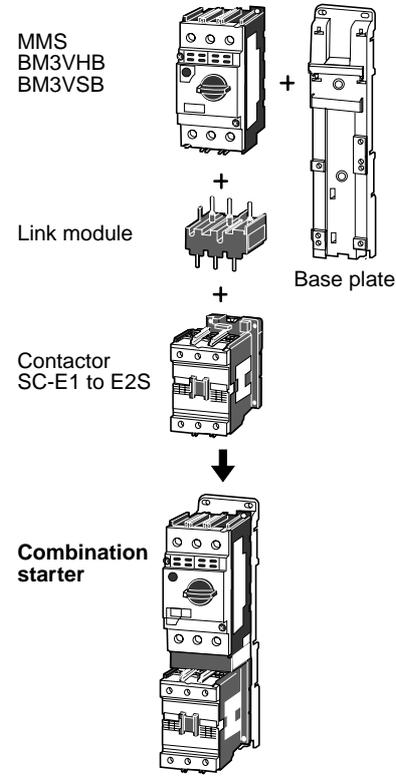

# DUO series Combination Starters Configuration

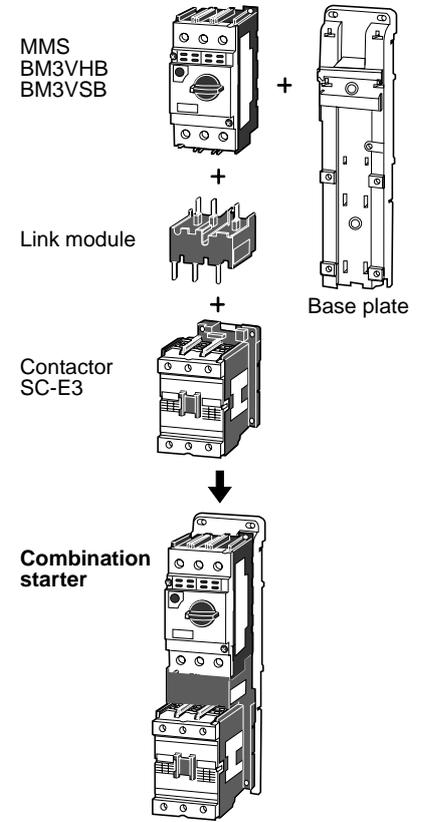

## • BM3RHB+SC-E1

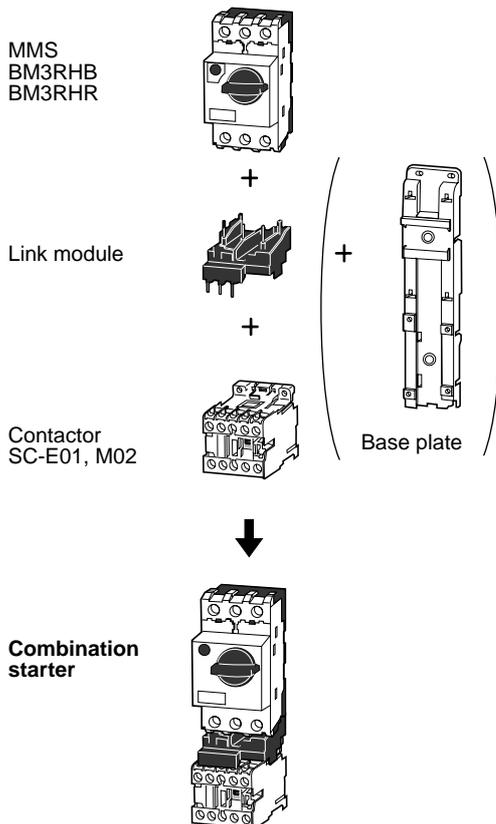

## • BM3V□B+SC-E1 to E2S

## • BM3V□B+SC-E3

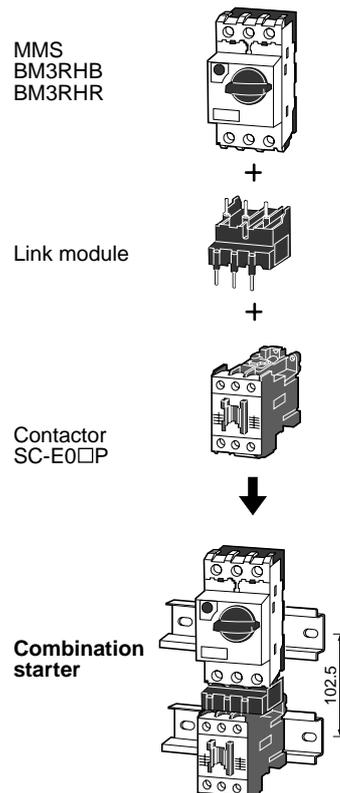

## • BM3RH□+SC-M01, M02

## • BM3R□+SC-E0□P

(When two mounting rails are used)

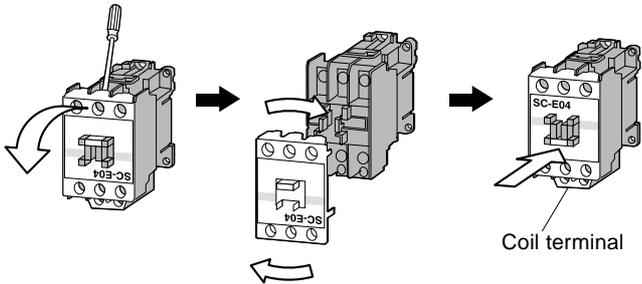

■ **Note to mount an MMS and contactor**

When the manual motor starter and magnetic contactor are configured as a combination starter, the nameplate ends up facing the wrong direction because the coil terminal of the magnetic contactor faces downward. Use the following procedure to turn the nameplate upside down.

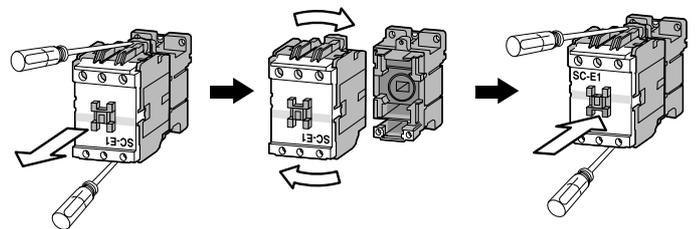

**For SC-E02 to SC-E05 magnetic contactors**

- Insert a flat-blade screwdriver between the center pole of arc-chamber (S phase or V phase) and the terminal screw, and lift the arc-chamber to remove it.
- After removing the arc-chamber, turn it 180 degrees (top to bottom), then re-mount it onto the magnetic contactor.
- Align the arc-chamber with the top and bottom terminals and press it on firmly by hand.

**For SC-E1 to SC-E3 magnetic contactors**

- Use a Phillips screwdriver to remove the two screws securing the front and back bodies.
- Remove the front body and turn it 180 degrees (top to bottom), then re-mount it with the screws.
- Make sure that no foreign matter enters the interior of the magnetic contactor during this removal/re-mounting procedure.

### Catalog Disclaimer

The information contained in this catalog does not constitute an express or implied warranty of quality, any warranty of merchantability or fitness for a particular purpose is hereby disclaimed.

Since the user's product information, specific use application, and conditions of use are all outside of Fuji Electric FA Components & Systems' control, **it shall be the responsibility of the user to determine the suitability of any of the products mentioned for the user's application.**

### One Year Limited Warranty

The products identified in this catalog shall be sold pursuant to the terms and conditions identified in the "Conditions of Sale" issued by Fuji Electric FA with each order confirmation.

Except to the extent otherwise provided for in the Conditions of Sale issued by Fuji Electric FA, Fuji Electric FA warrants that the Fuji Electric FA products identified in this catalog shall be free from significant defects in materials and workmanship provided the product has not been: 1) repaired or altered by others than Fuji Electric FA; 2) subjected to negligence, accident, misuse, or damage by circumstances beyond Fuji Electric FA's control; 3) improperly operated, maintained or stored; or 4) used in other than normal use or service. This warranty shall apply only to defects appearing within one (1) year from the date of shipment by Fuji Electric FA, and in such case, only if such defects are reported to Fuji Electric FA within thirty (30) days of discovery by purchaser. Such notice should be submitted in writing to Fuji Electric FA at 5-7, Nihonbashi Odemma-cho, Chuo-ku, Tokyo, Japan. The sole and exclusive remedy with respect to the above warranty whether such claim is based on warranty, contract, negligence, strict liability or any other theory, is limited to the repair or replacement of such product or, at Fuji Electric FA's option reimbursement by Fuji Electric FA of the purchase price paid to Fuji Electric FA for the particular product. **Fuji Electric FA does not make any other representations or warranties, whether oral or in writing, expressed or implied, including but not limited to any warranty regarding merchantability or fitness for a particular purpose.** Except as provided in the Conditions of Sale, no agent or representative of Fuji Electric FA is authorized to modify the terms of this warranty in writing or orally.

In no event shall Fuji Electric FA be liable for special, indirect or consequential damages, including but not limited to, loss of use of the product, other equipment, plant and power system which is installed with the product, loss of profits or revenues, cost of capital, or claims against the purchaser or user of the product by its customers resulting from the use of information, recommendations and descriptions contained herein. The purchaser agrees to pass on to its customers and users, in writing at the time inquiries and orders are received by buyer, Fuji Electric FA's warranty as set forth above.

### Caution "Safety precautions"

- Operate (keep) in the environment specified in the operating instructions and manual. High temperature, high humidity, condensation, dust, corrosive gases, oil, organic solvents, excessive vibration or shock might cause electric shock, fire, erratic operation or failure.
- Follow the regulations of industrial wastes when the product is to be discarded.
- The products covered in this catalog have not been designed or manufactured for use in equipment or systems which, in the event of failure, can lead to loss of human life.
- If you intend to use the products covered in this catalog for special applications, such as for nuclear energy control, aerospace, medical, or transportation, please consult our Fuji Electric FA agent.
- Be sure to provide protective measures when using the product covered in these catalogs in equipment which, in the event of failure, may lead to loss of human life or other grave results.
- Follow the directions of the operating instructions when mounting the product.
